SECTION 3 - SWITCHED ACCESS SERVICE

3.1 GENERAL

Switched Access Service, which is available to Customers for their use in furnishing their services to their End Users, provides a two-point electrical communications path between a Customer's premises and a Customer's End User's premises. It provides for the use of common terminating, switching and trunking facilities, and for the use of common subscriber plant of the Company. Switched Access Service provides for the ability to originate calls from a Customer's End User's premises to a Customer's premises in the LATA where it is provided.

The application of rates for Switched Access Service is described in Section 3.2 following.

3.2 RATE CATEGORIES

The rate categories that apply to Switched Access Service, as provided by Company, are:

- Tandem Switching
- Tandem Switched Transport
Tandem Switched Facility
Tandem Switched Termination
- 8XX Data Base Query

(N)

SECTION 3 - SWITCHED ACCESS SERVICE

3.2 RATE CATEGORIES (Cont'd)

3.2.1 Service Definition

Tandem Switched Transport facilities are shared trunks that carry the combined traffic of more than one Interexchange Carrier from an end office to an access tandem where the calls are then switched onto trunks that are dedicated to individual Interexchange Carriers for transport from the access tandem to the serving wire center. Tandem Switched Transport service is provisioned in two parts: (1) transmission from the end office to the tandem over shared circuits; (2) the tandem switching function itself.

3.2.2 Billing Components

Tandem Switched Transport service is billed in two parts as applicable: (1) A usage-based, distance sensitive Tandem Switched Facility charge applied to the shared interoffice transmission between the end office and the tandem. In addition, a usage-based Tandem Switched Termination charge is applied at each end of each measured Tandem Switched Facility segment. Distance is measured in airline miles between the end office and the tandem. Additionally, if the mileage is zero, no Facility or Termination charges apply; (2) A usage-based Tandem Switching charge is applied at each tandem that performs a tandem switching function.

SECTION 3 - SWITCHED ACCESS SERVICE**3.3 OBLIGATIONS OF THE COMPANY**

The Company has certain obligations pertaining only to the provision of Switched Access Service. These obligations are as follows:

3.3.1 Network Management

The Company will administer its network to provide acceptable service levels to all telecommunications users of the Company's network services. Generally, service levels are considered acceptable only when both Customer's End Users and Customers are able to establish connections with little or no delay encountered within the Company's network. The Company maintains the right to apply protective controls, i.e., those actions, such as call gapping, which selectively cancel the completion of any traffic carried over its network, including that associated with a Customer's Switched Access Service. Generally, such protective measures would only be taken as a result of occurrences such as a failure or overload of Company or Customer facilities, natural disasters, mass calling or national security demands.

SECTION 4 - SWITCHED ACCESS SERVICE

3.3 OBLIGATIONS OF THE COMPANY (Cont'd)

3.3.2 Design and Traffic Routing of Switched Access Service

The Company shall design and determine the routing of Switched Access Service, including the selection of the first point of switching and the selection of facilities from the interface to any switching point and to the end offices where busy hour minutes of capacity are ordered. The Company shall also decide if capacity is to be provided by originating only, terminating only, or two-way trunk groups. Finally, the Company will decide whether trunk side access will be provided through the use of two-wire or four-wire trunk terminating equipment. Selection of facilities and equipment and traffic routing of the service are based on standard engineering methods, available facilities and equipment and the Company's traffic routing plans.

SECTION 4 - SWITCHED ACCESS SERVICE**3.3 OBLIGATIONS OF THE COMPANY (Cont'd)****3.3.3 Provision of Service Performance Data**

Subject to availability, end-to-end service performance data available to the Company through its own service evaluation routines, may also be made available to the Customer based on previously arranged intervals and format. The data provides information on overall end-to-end call completion and non-completion performance e.g., Customer equipment blockage, failure results and transmission performance. The data does not include service performance data provided under other Tariff sections, e.g., testing service results. If data is to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis.

3.3.4 Trunk Group Measurements Reports

Subject to availability, the Company will make available trunk group data in the form of usage in CCS, peg count and overflow to the Customer based on previously agreed to intervals.

SECTION 3 - SWITCHED ACCESS SERVICE**3.4 OBLIGATIONS OF THE CUSTOMER**

The Customer has certain specific obligations pertaining to the use of Switched Access Service.

3.4.1 Report Requirements

Customers are responsible for providing the following reports to the Company, when applicable.

(A) Jurisdictional Reports

When a Customer orders Switched Access Service for both interstate and intrastate use, the Customer is responsible for providing reports as set forth in Section 2 preceding. Charges will be apportioned in accordance with those reports.

(B) Code Screening Reports

When a Customer orders service call routing, trunk access limitation or call gapping arrangements, it must report the number of trunks and/or the appropriate codes to be instituted in each end office or access tandem switch, for each of the arrangements ordered.

The Company will administer its network in such a manner that the impact of traffic surges due to peaked 900 Access Service traffic on other access service traffic is minimized. Network management controls as defined in Section 3.3.1 may be implemented at the Company option to ensure acceptable service levels.

3.4.2 On and Off-Hook Supervision

The Customer facilities shall provide the necessary on and off-hook supervision for accurate timing of calls.

3.4.3 Trunk Group Measurements Reports

With the agreement of the Customer, trunk group data in the form of usage in CCS, peg count and overflow for its end of all access trunk groups, where technologically feasible, will be made available to the Company. The data will be used to monitor trunk group utilization and service performance and will be based on previously arranged intervals and format.

SECTION 3 - SWITCHED ACCESS SERVICE

3.5 RATE REGULATIONS

This Section contains the specific regulations governing the rates and charges that apply for Switched Access Service.

Access Charges are applied on a per access minute basis. Access minute charges are accumulated over a monthly period.

3.5.1 Minimum Periods

Switched Access Service is provided for a minimum period of one month.

SECTION 3 - SWITCHED ACCESS SERVICE

3.5 RATE REGULATIONS (Cont'd)

3.5.2 Cancellation of Access Service Order

A Customer may cancel an Access Order for the installation of service on any date prior to notification by the Company that service is available for the Customer's Use or prior to the service date, whichever is later. The cancellation date is the date the Company receives written or verbal notice from the Customer that the order is to be canceled. The verbal notice must be followed by written confirmation within 10 days. If a Customer or End User is unable to accept Access Service within 30 calendar days of the original service date, the Access Order will be canceled and applicable charges will apply.

Prior to Firm Order Confirmation Date:

If an Access Order is canceled prior to the Firm Order Confirmation date, no charges will apply.

On or After Firm Order Confirmation Date:

If an Access Order is canceled on or after the Firm Order Confirmation date, the Customer will be billed a charge equal to the cost incurred in such installation less net salvage, or the charge for the minimum period.

3.5.3 8XX Data Base Query

The 8XX Data Base Query Charge will apply for each Toll-Free 8XX call query received at the Company's (or its provider's) Toll-Free 8XX data base. A Basic or Vertical Feature Query charge is assessed for each completed query returned from the data base identifying the Customer to whom the call will be delivered whether or not the actual call is delivered to the Customer. The Basic Query provides the identification of the Customer to whom the call will be delivered and includes area of service routing which allows routing of 800 series calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same Customer identification as the basic query and vertical features which may include: (1) call validation, (ensuring that calls originate from subscribed service areas); (2) POTS translation of 800 series numbers; (3) alternate POTS translation (which allows subscribers to vary the routing of 800 series calls based on factors such as time of day, place or origination of the call, etc.); and (4) multiple carrier routing (which allows subscribers to route to different carriers based on factors similar to those in (3)). The Vertical Feature charge will be assessed for each feature used on a call.

3.6 IDENTIFICATION AND RATING OF VOIP-PSTN TRAFFIC

(A) Scope

(1) VoIP-PSTN Traffic is defined as traffic exchanged between a Company end user and the customer in time division multiplexing (“TDM”) format that originates and/or terminates in Internet protocol (“IP”) format. This section governs the identification of VoIP-PSTN Traffic that is required to be compensated at interstate access rates (unless the parties have agreed otherwise) by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) (“FCC Order”). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as “Relevant VoIP-PSTN Traffic”) from the customer’s traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Order.

(2) This section (“Identification and Rating of VoIP-PSTN Traffic”) will be applied to the billing of switched access charges to a customer that is a local exchange carrier only to the extent that the customer has also implemented billing of interstate access charges for Relevant VoIP-PSTN Traffic in accordance with the FCC Order.

(B) RATING OF VOIP-PSTN TRAFFIC

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Company’s applicable tariffed interstate switched access rates as specified in Common Point LLC’s FCC Tariff No. 1. As of January 1, 2012, the applicable tariffed interstate switched access rates can be found in Sections 3, 4, and 5. Common Point’s FCC Tariff No. 1. If a customer would like assistance finding a current version of Common Point’s FCC Tariff, the customer may contact the Company toll free at 1-877-366-2674.

SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D)

(N)

3.6 IDENTIFICATION AND RATING OF VOIP-PSTN TRAFFIC (CONT'D)

(C) CALCULATION AND APPLICATION OF PERCENT-VOIP-USAGE FACTOR

The Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection (B), above, by applying a Percent VoIP Usage ("PVU") factor to the originating intrastate MOU exchanged between a Company end user and the customer. The PVU will be derived and applied as follows:

(1) The customer will calculate and furnish to the Company a factor (the "PVU-C") representing the percentage of the originating intrastate MOU that the customer exchanges with the Company in the State, that (a) is sent to the Company by the customer and that originated in IP format; or (b) is received by the customer from the Company and terminated in IP format. This PVU-C shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

(2) The Company will, likewise, calculate a factor (the "PVU-CP") representing the percentage of the Company's originating intrastate MOU in the State that the Company originates or terminates on its network in IP format. This PVU-CP shall be based on information, such as the number of the Company's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

(N)

SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D)

3.6 IDENTIFICATION AND RATING OF VOIP-PSTN TRAFFIC (CONT'D)

(C) CALCULATION AND APPLICATION OF PERCENT-VOIP-USAGE FACTOR (CONT'D)

(3) The Company will use the PVU-C and PVU-CP factors to calculate a PVU factor that represents the percentage of originating intrastate MOU exchanged between a Company end user and the customer that is originated or terminated in IP format, whether at Company's end, at the customer's end, or at both ends. The PVU factor will be calculated as the sum of: (A) the PVU-C factor and (B) the PVU-CP factor times (1.0 minus the PVU-C factor).

(4) The Company will apply the PVU factor to the originating intrastate MOU exchanged with the customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.

Example 1: The PVU-CP is 10% and the PVU-C is 40%. The PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the customer's intrastate access MOU at its applicable tariffed interstate rates.

Example 2: The PVU-CP is 10% and the PVU-C is 0%. The PVU factor is $0\% + (100\% \times 10\%) = 10\%$. The Company will bill 10% of the customer's intrastate access MOU at Company's applicable tariffed interstate switched access rates.

Example 3: The PVU-C is 100%. No matter what the PVU-CP factor is, the PVU is 100%. The Company will bill 100% of the customer's intrastate access MOU at Company's applicable tariffed interstate switched access rates.

(5) If the customer does not furnish the Company with a PVU-C pursuant to the preceding paragraph 1, the Company will utilize a PVU equal to the PVU-CP.

SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D)

3.6 IDENTIFICATION AND RATING OF VOIP-PSTN TRAFFIC (CONT'D)

(C) CALCULATION AND APPLICATION OF PERCENT-VOIP-USAGE FACTOR (CONT'D)

(D) INITIAL PVU FACTOR

If the PVU factor is not available and/or cannot be implemented in the Company's billing systems by the effective date of this Tariff, then once the factor is available and can be implemented the Company will adjust the customer's bills to reflect the PVU retroactively to the effective date of this Tariff. In calculating the initial PVU, the Company will take the customer-specified PVU-C into account retroactively to the effective date of this Tariff, provided that the customer provides the factor to the Company no later than four months after the effective date of this Tariff; otherwise, the Company will set the initial PVU equal to the PVU-CP, as specified in subsection (C)(5), above.

(E) PVU FACTOR UPDATES

The customer may update the PVU-C factor quarterly using the method set forth in subsection (C)(1), above. If the customer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first day of January, April, July and/or October of each year, a revised PVU-C factor based on data for the prior three months, ending the last day of December, March, June and September, respectively. The Company will use the revised PVU-C to calculate a revised PVU. The revised PVU factor will apply prospectively and serve as the basis for billing until superseded by a new PVU.

(F) PVU FACTOR VERIFICATION

Not more than twice in any year, the Company may ask the customer to verify the PVU-C factor furnished to the Company and customer may ask the Company to verify the PVU-CP factor and the calculation of the PVU factor. The party so requested shall comply, and shall reasonably provide the records and other information used to determine the respective PVU-C and PVU-CP factors.
